CERTIFICATIONS AND WARRANTIES

MEANINGFUL DESIGN TO INSPIRE PEOPLE'S LIVES

WE INSPIRE LIFE THROUGH DESIGN

Cosentino is the global company originating from Spain, dedicated to the design and manufacturing of advanced architectural surfaces.

From Almería, we have been present in kitchens around the world with Silestone for over 30 years. Along this journey, we have developed innovative and leading surfaces like Dekton, aimed at the world of architecture with over a decade of trajectory, and this year we are introducing ĒCLOS, our new generation of mineral surfaces set to redefine interior design.

We complete our offering with Sensa, our premium range of protected natural stone, and Scalea, the company's most exclusive selection of natural stones. Every day, we work alongside architects, interior designers, builders, and individuals to transform the spaces we inhabit using high-performance, sustainable materials driven by technology and design. With this vision, Cosentino creates solutions that combine aesthetics, functionality, and durability, redefining how we live in our spaces.

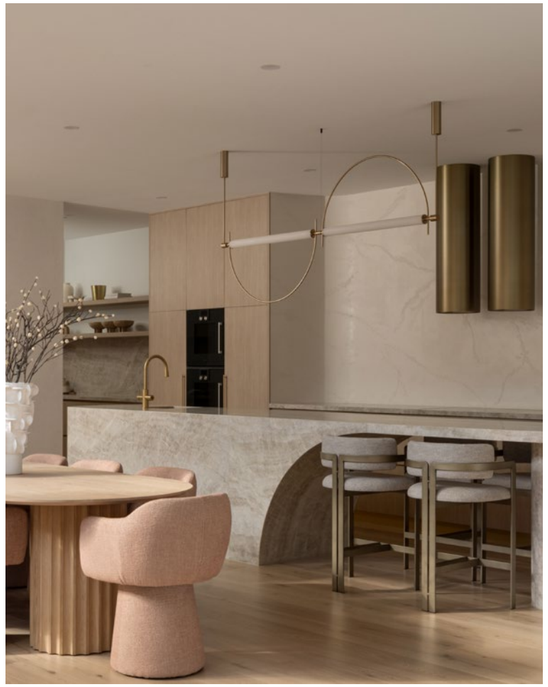
Solutions for designing with purpose

SOLUTIONS FOR DESIGNING WITH PURPOSE

INNOVATION, DESIGN, AND GLOBAL SERVICE

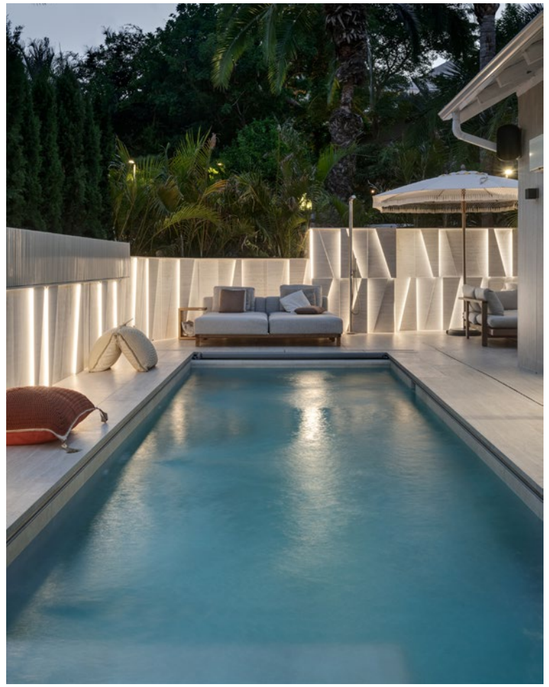
MUCH MORE THAN SURFACES

Sinks, integrated sinks, shower trays, flooring pieces, furniture, customized pieces, façade systems, or large-format slabs: more than surfaces, we offer tailored solutions and elements that allow limitless design.



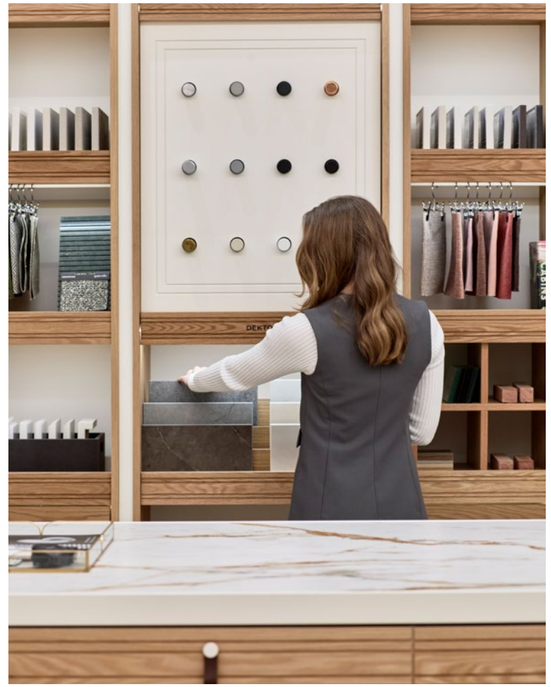
DURABLE MATERIALS FOR EVERYDAY LIFE

Our diverse surface options are at the forefront of design, style, and performance. Innovative and sustainable materials to withstand daily use for many years: Cooking. Gathering. Living.



A WORLD OF CHOICES

Our brands create cohesive and personalized spaces: kitchens, bathrooms, living rooms, floors, terraces, pools, or façades. Color and finish options for every style. Everything fits. Everything is possible. Everything speaks about you.



SUPPORT HERE AND ANYWHERE

From Cosentino City to the final delivery of the project. Cosentino will guide you in every decision: inspiration, samples, advice, and practical help to make your project easy to execute and secure.

COSENTINO CITY & STUDIO

Cosentino City and Cosentino Studio are designed as places of inspiration, meeting, and creation for interior designers, architects, and individual clients to find everything they need in their relationship with Cosentino.

COSENTINO CITY & STUDIO

A SPACE TO IMAGINE YOUR NEW HOME

Book your appointment now at your nearest Showroom

EXPERIENCE ZONES

Get inspired and combine materials your way.

In our Atelier, you can experiment with colors, textures, and finishes as if it were your own creative lab. A space where you can visualize your project, create moodboards, and find the perfect mix for your lifestyle.

PERSONALIZED VISITS

We guide you to make the best decision.

You can book a visit to address any questions, view large-scale surfaces, and explore all available options. A calm setting to envision how your future space will look with the help of our specialists.

SPECIALIZED ADVICE

Solutions for your kitchen, bathroom, or any area of your home.

Our team guides you in choosing the right material based on your style, usage, and needs: from countertops to flooring, walls, exteriors, or integrated solutions. With Silestone, Dekton, Ēclos, Sensa, and Scalea, you'll find the perfect combination for your home.

COSENTINO SPACES

Get inspired by real homes where Cosentino materials transform every corner into a unique space. A selection of projects demonstrating how Cosentino can help shape the house you envision and turn it into a home with style, elegance, and personality to enjoy.

COSENTINO BATHROOMS

COSENTINO BATHROOM.
A NEW BATHROOM EXPERIENCE

Cosentino Bathroom introduces a renewed vision of bathroom spaces. Cutting-edge design and technology converge in a single space through our next-generation surfaces: Silestone, Dekton, Ēclos, Sensa, and Scalea, expanding the possibilities to create a unique and functional bathroom environment with a completely revitalized aesthetic.

CUSTOM MATERIALS FOR EVERY PROJECT

Our products are made-to-order using fast manufacturing systems. This allows us to offer tailor-made designs that fit every client and project.

PERFECT FOR WET AREAS

Materials that virtually do not absorb water, resist humidity, and make cleaning easier. Ideal for showers, sinks, and areas in direct contact with water. They will stay looking new for years.

VISUAL CONTINUITY. A MORE BEAUTIFUL BATHROOM.

Thanks to our large-format solutions, you will minimize joints, avoid dirt, and gain hygiene and visual continuity. A sophisticated and much more practical finish.

SINKS: INTEGRATED AND COUNTERTOP MODELS

We offer a complete range of versatile, contemporary, and elegant sinks. Made with Dekton and Silestone, they allow seamless integration with the other bathroom elements.

SEAMLESS FLOORING AND WALL CLADDING

Applications where format variety is key: different sizes and thicknesses for use on walls and floors, always ensuring design and durability.

SHOWER TRAYS. DESIGN AT YOUR FEET.

Manufactured with our non-slip Grip+ treatments for Dekton and sandblasted finishes for Silestone. A versatile, customizable, and safe selection for any type of shower.

COSENTINO BATHROOM

A COMPREHENSIVE VISION OF THE CONTEMPORARY BATHROOM

Cosentino Bathroom offers a global approach to bathroom design. A selection of high-performance materials and products designed to fit any space, simplify choices, and ensure aesthetic continuity, functionality, and durability. Designing a custom bathroom can be a clear, organized, and accessible process.

MULTIPLE OPTIONS TO CHOOSE FROM

A SERENE SPACE FOR RELAXATION

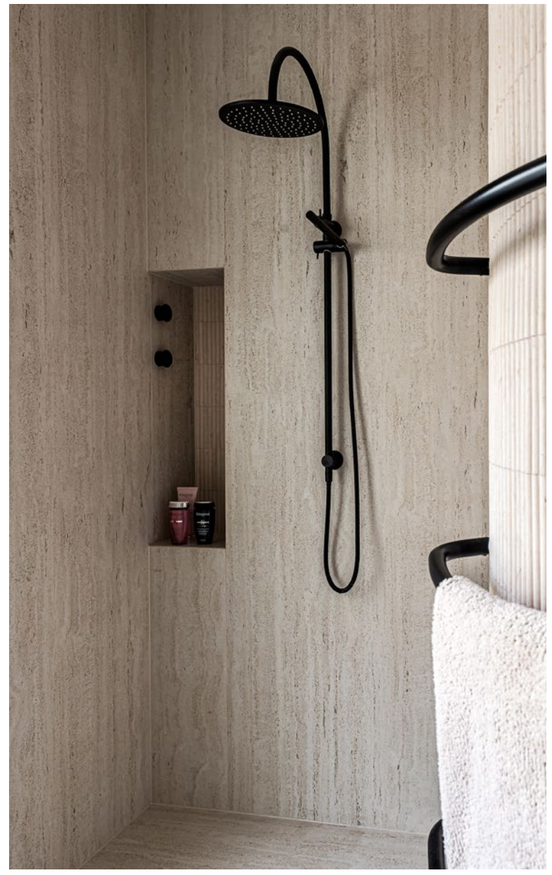
KENISUR | Caroline Rusinek
Netherlands

The inspiration for the bathroom in Caroline Rusinek's own home partly comes from the walnut wood already present in other rooms of the house.

The sink countertop and the back wall of the cabinet are also made of Dekton Grigio. With its warm tones and gray hues, Dekton Grigio blends perfectly with the same walnut wood that has also been used for the spacious bathroom furniture. This furniture provides ample storage, bringing a sense of calm to the bathroom.

"I wanted the same material for the sink, the floor, and the walls.
This was easily achievable with Dekton. In the past, I have frequently used Cosentino in various kitchen projects, but this was the first time I applied the materials in a bathroom.
The result is absolutely to my liking," explains Carolina Rusinek.

Flooring, shower cladding, countertop, and wall paneling Dekton **Grigio**



A CONSISTENT AND SPACIOUS BATHROOM

Tanik Design
Australia

In this small private paradise, the bathroom needed to meet the requirements. If the clients' idea was to feel comfortable, the water area had to resemble a spa. This vision was brought to life by designer Tania Nikolitis from Tanik Design, who was in charge of turning this dream into reality.

"Using Dekton in wet areas makes the interior look consistent, spacious, and with a resort-like, hotel feel," they confirm from the studio. To address this specific area, they chose Dekton Marmorio. The continuity of this travertine-like tone, with its linear nature, creates an appearance of cascading stone walls. "Its soft palette allowed me to highlight striking sanitary items. Although the flooring, cladding, and countertop in Dekton Marmorio provide contrast, they work very harmoniously together. Even the custom mirror frames take on a different meaning here."

Flooring, countertop, shower tray, and cladding
Dekton **Marmorio**

MICROCEMENT AND DEKTON KHALO FOR A MODERN AND ELEGANT BATHROOM

Murat Imamoglu
Netherlands

In this project, named Cici, architect Murat Imamoglu selected Dekton Khalo for its striking appearance and the luxury aesthetic it brings to the design.

The client wanted to use large-format slabs with significant visual impact in various bathrooms and toilets while maintaining harmony with more subdued materials.

Thus, in each room, one wall was covered with Dekton Khalo, while the rest was finished with microcement, a combination that creates a harmonious ensemble. The most notable architectural and decorative element of the project is a custom-made sink crafted with Dekton Khalo. Combined with the inclined partition of the shower, it creates a balance between sculptural and functional elements, giving the space unique character.

Sink, countertop, and cladding
Dekton **Khalo**

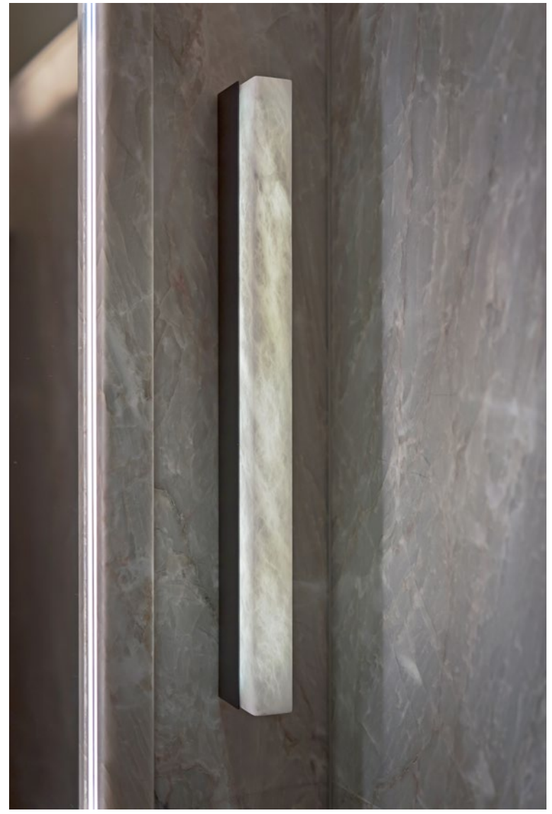
EXTREMELY PHOTOGENIC BATHROOMS THANKS TO SILESTONE

BuilderHer8
Australia

As the home's creators pointed out, the bathrooms also stand out as captivating spaces. The house's washrooms are both modern and timeless and, above all, highly photogenic.

"The bathrooms are a tranquil retreat to connect with oneself, featuring textures similar to the laundry area. With a countertop of Silestone Pearl Jasmine, the bathroom furniture is wall-mounted to create a clean and floating visual impression," they explain. And they continue: "Inspired by white limestone, Silestone Pearl Jasmine features delicate gray veining over a white base, granting an organic patina to the bathroom's predominantly linear design vocabulary with its crackled effect."

Countertop
Silestone **Pearl Jasmine**



THE ART OF PAUL BADRAN

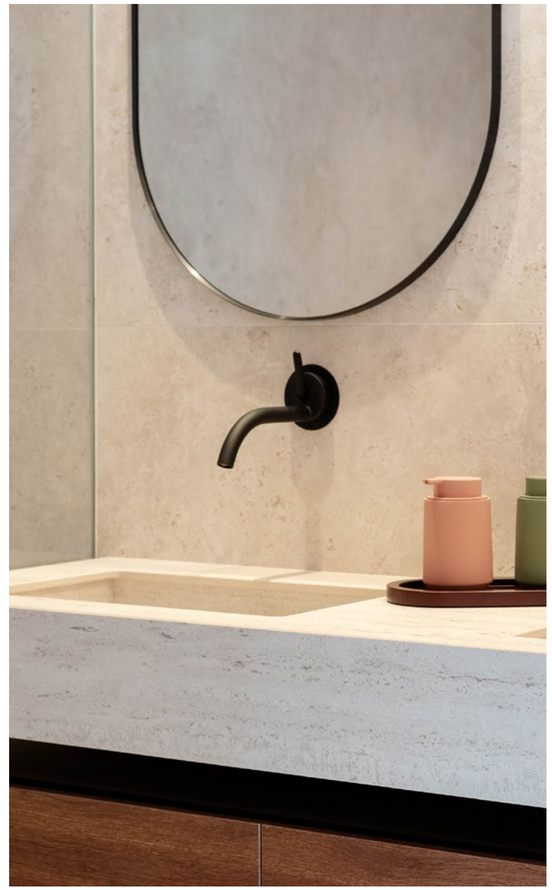
Paul Badran
Sweden

In Stockholm, Paul Badran has transformed one of the bathrooms in his Nacka home into a unique piece worthy of a visit.

The choice of material was no accident: Sensa Vancouver, a natural quartz with stain-resistant protection, ensures beauty, that's clear, but also practicality for daily use. From the walls to the sink and furniture, every surface is clad in this natural stone, creating a visual and tactile experience that reinforces the idea of a holistic space.

This choice not only guarantees optimal durability but also adds a touch of sophistication. According to Kitchens by Paul, “the bathroom design aims to integrate with the rest of the home, avoiding it becoming an isolated space.”

Sink, countertop, and cladding
Sensa **Vancouver**



DEKTON AS THE GUIDING THREAD

Matos dos Santos Architects
Luis Santos
Portugal

Dekton by Cosentino is featured throughout the home, both in the kitchen and bathrooms, reinforcing the idea of visual unity and material coherence.

The architects explain: “The decision to use Dekton as a cladding material in the bathrooms—applied to walls, floors, and integrated sinks—reinforces the idea of visual unity and continuity while ensuring strength, durability, and easy maintenance.”

In the master suite, Dekton Sabbia has been chosen for the floors, walls, and shower, complemented by Dekton Marmorio in the sink, while the second bathroom features a Dekton Nebbia composition applied to the walls, shower, and sink.

INTERIORS AND LIVING SPACES

THE PERFECT FOUNDATION FOR A MORE CONNECTED INTERIOR

A single material capable of providing unity and character to your home's entire interior. The versatility of our surfaces allows them to be used on floors and walls to create continuity, visually expand spaces, and craft more harmonious and functional environments.

DETAILED PERSONALIZATION

Designing a living room with personality, coherence, and elegance begins by choosing surfaces that adapt to your style. Dekton and Silestone offer a wide range of colors, textures, and finishes to cover floors, walls, and even staircases.

EVERYDAY DURABILITY

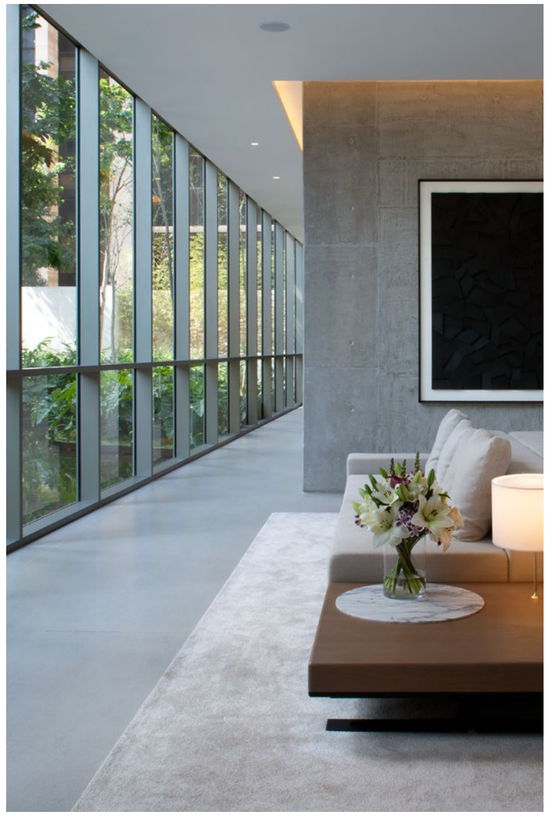
The living room is one of the busiest areas of the home. Dekton withstands impacts, scratches, stains, high temperatures, and UV rays without deteriorating. A durable, low-maintenance surface perfect for keeping up with the real pace of home life.

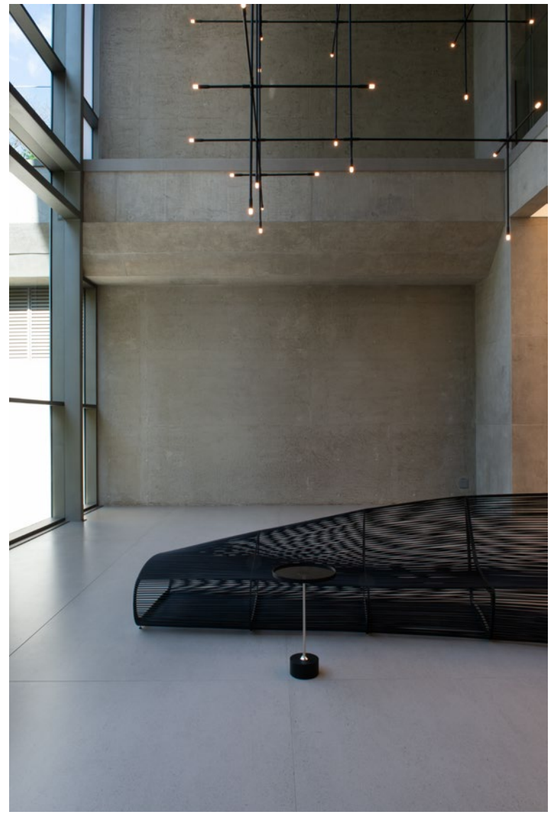
IMPECCABLE FINISHES IN EVERY DETAIL

Our surfaces allow you to create thin and precise cladding that adapts to every corner of living rooms and other spaces. The result is surfaces with a highly meticulous finish and a refined aesthetic that enhances the home with elegance.

MINIMAL JOINTS. EASY CLEANING

Thanks to their large format, Silestone and Dekton cover extensive surfaces, including staircases and furniture, with minimal joints. This results in a seamless, elegant design that is easy to clean. Fewer joints mean less maintenance.





THE MOST GROUND-BREAKING PROPERTY IN SÃO PAULO

Carlos Rossi, Jader Almeida
Brazil

The common areas of Casa Brazileira, a building set to become a landmark in the country's design landscape, are designed by the award-winning Jader Almeida.
His furniture is present in all the spaces, complemented by pieces designed exclusively for this project.

Almeida chose Cosentino products as the raw material for his work. "We selected Dekton for the project because it has unique technical characteristics that set it apart from other materials, such as its high resistance to UV rays and stains, low porosity, and excellent durability in high-traffic areas," he explains. Dekton Strato, for instance, was used as flooring throughout all the common areas.

Architect Carlos Rossi was responsible for designing the interiors of the first completed unit of the development. To decorate these refined spaces, Rossi also chose Cosentino products for the flooring and the cladding in the kitchen and bathroom, opting for Dekton Sasea, a color inspired by the distinguished Sahel limestone.

THREE SPACES UNITED THROUGH ONE MATERIAL

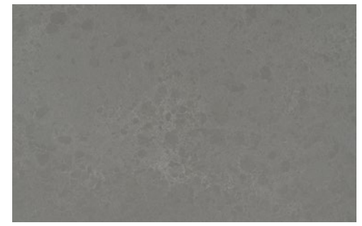
Marcelo Rodrigues
Portugal

The most striking feature of this apartment is undoubtedly the main staircase, where Silestone, Cosentino's hybrid mineral surface, becomes the focal point of the design.

The steps, precisely sculpted from this unique material, take on a sculptural and contemporary character.

Marcelo Rodrigues emphasizes: "The idea was to give a minimalist look with cement as the base to the interior zigzag-shaped staircase, while maintaining the lightness of its structure. Due to the proximity of the kitchen, it was important to create a fluid and harmonious connection between the spaces."

Marcelo continues: "The result is fantastic and sober, exactly as intended." For an architect and interior designer, having the right tools to bring their designs from the blueprint to reality is essential. This is how this home managed to reinterpret the industrial style originally rooted in 1950s New York lofts.



Flooring, steps, and kitchen countertop
Silestone **Seaport**

DEKTON ENTZO: A LIGHT AND LUXURIOUS SENSATION

Supernormal Design Studio
Malaysia

When the owners of this three-story townhouse hired Supernormal Design Studio, the freedom was almost total—they needed to adapt the space for their family of six, creating a home that was both cozy and full of character, with unconventional curves and shapes. Beyond that, they had carte blanche.

The open layout, light colors, and cleverly placed skylights contribute to a lightweight and consistent look for the space. "We used Dekton Entzo for the entire flooring on the ground floor to achieve a uniform and cohesive appearance while minimizing joints for a more polished finish," the studio explains.

"We chose a white background for its luminous and airy feeling, enhancing the overall sense of space and lightness in the design," they continue.

Flooring
Dekton **Entzo**

ELEVATING EVERYDAY LIFE

Nakisa Rezvani
NRK Design Studio
USA

Designer Nakisa Rezvani from NRK Design Studio aimed to create a home that felt open, balanced, and connected while simultaneously offering moments of depth and contrast.

Light finishes were chosen to maximize the sense of lightness, while dark accents were strategically introduced to anchor the spaces and create a visual rhythm.

Cosentino materials played a key role in keeping this design language consistent throughout the home. The living room fireplace becomes a sculptural focal point, clad in Dekton Rem with Ukiyo fluting to add texture and dimension.

Fireplace cladding
Dekton Ukiyo **Rem**

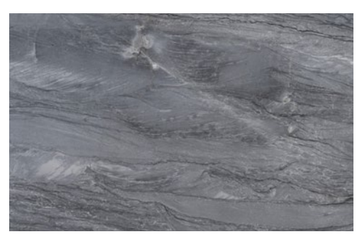
BEAUTY, NATURALITY, AND FUNCTIONALITY

Taty Irie Arquitetura
Brazil

It is immediately noticeable upon entering the majestic lobby of this high-end complex, whose walls have been clad with Sensa Platino.

This stunning quartzite brings a sense of purity, evoking the movement of ocean waves through its veining. Its leather finish (non-glossy with a special texture) adds elegance and sophistication to the space, while Sensa's stain-resistant treatment makes it highly suitable for intensive use.

Thanks to this winning combination, Sensa Platino is also visible in common areas such as the wall framing the TV zone or in the vanities with integrated sinks in the bathrooms. The work and dining tables, as well as the walls in the meeting area and even a small custom-designed round table in the living room, are also crafted with this material, making it one of the most distinctive aesthetic features of the complex.



Wall cladding and work and dining tables
Sensa **Platino**

A HISTORIC LOFT IN ROTTERDAM

Bouwerij Baan
Netherlands

This Rotterdam loft was the first design project where the Bouwerij Baan studio team used Cosentino materials.

A unique project, both for its location and the specific wishes of the client. The apartment is located in a former warehouse where coffee and spices were once stored. The client had a clear vision: a brighter home that also incorporated the use of the most sustainable materials possible.

The loft already featured a continuous flooring system with underfloor heating, meaning the new flooring had to be installed over it. To choose the material, they turned to Cosentino, specifically Dekton. "We chose Dekton because it is strong and scratch-resistant, and it offers a beautiful palette of natural colors to choose from. Moreover, Dekton comes in different sizes and applications, which allowed us to use the selected colors in various spaces," explain Michiel and Nathalie from Bouwerij Baan.

Flooring
Dekton **Nebbia**

COSENTINO KITCHENS

THE KITCHEN: WHERE DESIGN IS LIVED EVERY DAY

The kitchen is the heart of the home, a space where we spend more and more time. That's why design, comfort, and materials matter more than ever. Cosentino surfaces are designed to support you in everything: cooking, gathering, or simply enjoying. They are durable, beautiful, and easy to maintain, elevating your kitchen's style while making it more functional, long-lasting, and personal.

SURFACES THAT WITHSTAND EVERY LIFESTYLE

Worktops that withstand heat, resist stains, impacts, and intensive use without losing their beauty. Materials designed for fearless cooking and living your kitchen without limits.

DESIGN THAT SPEAKS TO EVERY PERSONAL STYLE

Colors, veins, textures, and finishes for every style: from minimalist kitchens to warm and natural spaces. Each material brings personality and harmony to the whole.

EASY TO CLEAN. EASY TO ENJOY.

Surfaces that simplify your daily life. They require no special care and remain spotless with minimal maintenance.

DIFFERENT FORMATS FOR A MORE FUNCTIONAL SPACE

Integrated sinks, backsplashes, bars, tables, vertical panels, and large formats that unify the entire design. A kitchen that is more cohesive, elegant, and practical.

A KITCHEN TO ENJOY FOR MANY YEARS

Durable, sustainable, and guaranteed surfaces and products that stay with you for many years. A smart investment for your home.

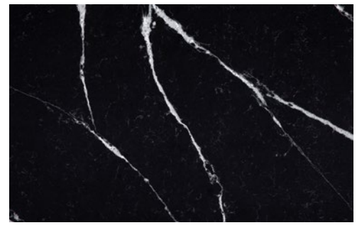
ARMONÍA BY SILESTONE

Italy

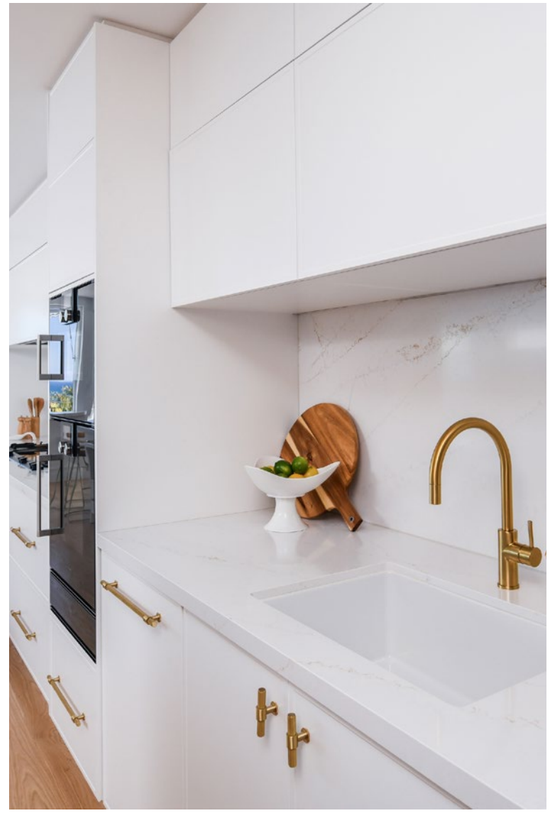
The project stems from the desire to integrate a contemporary kitchen into a space with strong architectural character, resulting in a balanced, functional, and visually serene atmosphere.

The result is a proposal with clean lines and carefully selected materials, where each element contributes to a sense of continuity and order.

The use of Silestone Eternal Marquina on the island introduces a sophisticated accent thanks to its intense black background and white veining, adding dynamism without disrupting the overall harmony. This choice is paired with natural wood surfaces and metallic finishes in warm tones, creating a contrast that adds depth and avoids an overly uniform appearance.



Countertop and kitchen island
Silestone **Et. Marquina**



AN ICONIC ISLAND THAT DEFINES THE SPACE

Revamper Pty Ltd
Australia

The kitchen island is the centerpiece of the project. A 4.7-meter piece with smooth curves and a seamless finish that creates a sculptural effect. Its design integrates an S-shaped seating area and a breakfast bar for eight people, making the kitchen the perfect place to gather and enjoy.

To achieve this result, Silestone Ethereal Glow was chosen, a white color with subtle veining that fits the house's 'Coastal Luxe' style. In addition to its aesthetics, it stands out for being easy to clean, stain-resistant, and allowing for the creation of curves without visible joints, something other materials don't offer. The result is a beautiful, practical, and durable kitchen.

Island, countertop, and cladding
Silestone **Ethereal Glow**

TIMELESS AND CALM AMBIENCE

Darren James
Design & Construct
Australia

The kitchen was envisioned as the starting point for the home's materiality. Countertops made of Dekton Marmorio provide a serene and contemporary character, defined by the elegance of its soft veining and stony finish.

Visual coherence and a unified sensory experience across all spaces were sought, and the use of Dekton as a unifying thread strengthened the connection between private and social areas without compromising the project's aesthetics.

The Darren James team was clear about the material choice: 'We wanted a surface that offered uncompromising durability without sacrificing refined design. Dekton gave us the flexibility to use a single finish across multiple applications such as kitchens, stairs, and walls, ensuring consistency in tone and performance.'

Countertop, kitchen cladding, and island countertop
Dekton **Marmorio**

KITCHEN WITH MINIMALIST CHARACTER

Jasper Verhey
Netherlands

Jasper Verhey shared with the owners the desire to create a modern and comfortable home, resulting in a minimalist and elegant design with great attention to detail and quality.

"Dekton is a premium material for countertops, but to prevent the kitchen from becoming an isolated feature, I extended this choice to other interior elements. This way, harmony is created throughout the home. The look of Lunar fits perfectly with the serene atmosphere and ambiance I was aiming for. Additionally, Dekton's strong properties as a kitchen countertop were the basis of these choices," explains Verhey.

In this project, Dekton is also used for the kitchen flooring, the island fronts, and even incorporated into the TV furniture.

Island, countertop, and cladding in breakfast bar and flooring Dekton **Lunar**

PARISIAN SOPHISTICATION AND CUTTING-EDGE TECHNOLOGY

Paul Badran (MiaThéo)
Andrea Brodin
Sweden

Classic Parisian elegance and modern cars. This curious mix forms the main inspiration for Paul Badran, head of MiaThéo. The Lebanese designer, who has been creating kitchens since the age of 13, combines the old-world grandeur with cutting-edge technology, as evidenced by his latest project.

In this classic-style kitchen with cream tones, the striking countertop pattern inspired by Patagonia stone stands out. However, it is Dekton Khalo, with all its advantages: our material is resistant to impacts, scratches, cuts, and any other daily disturbances that occur in a kitchen space. "We love the contrast created between Dekton Khalo and the classic and light fronts," explains the designer about the work done for an Andrea Brodin project.

Countertop, cladding, and island countertop.
Dekton **Khalo**

A WARM AND INDUSTRIAL-STYLE FAMILY LOFT

Las 5 Glorias
Madrid

For the kitchen, which is visually very connected to the outdoors, a radiant white was chosen to maximize natural light. Both for the countertops of the wall module and the island, Blanco Zeus was selected, a nearly spotless, energetic, and timeless white from Silestone's Mythology series. The same color covers the walls and the column of the window area, creating a cleaner and more unified look.

The owners wanted an 'all-terrain' flooring that could withstand an active social life (not staining from a spilled glass of wine, for instance) and the demanding use of small children (scratches, impacts...). The interior designers recommended a safe bet, Dekton Nilium, an ultra-compact surface inspired by silver metal, with a subtle mix of white and gray tones representing the beginning of a material's oxidation process.

MAIN CURVES AND ORGANIC DESIGN

Tim Stewart Architects
FBI Interiors
Australia

An ode to the curve. This incredible project of an Australian home seems taken from an organic future, with sinuous lines and a certain Mediterranean vibe. There are many rooms that make up this unique home, but when the creators are asked about the biggest challenge they faced, they have no doubt: the five-meter curved bench of the kitchen island. Here, Cosentino's help proved invaluable, as the chosen surface was Sensa Taj Mahal.

This curved island acts as the central axis of the space, as its organic shape softens the volume and adds movement. Meanwhile, the subtle creamy veining enhances the natural tone of the surrounding wood, allowing the island to harmoniously integrate into the environment.

Island, island column, and kitchen countertop
Sensa **Taj Mahal**

EXTERIORS

PROJECTING YOUR STYLE OUTDOORS

Terraces, gardens, and pool areas that reflect your style. With Dekton, you can unify flooring, walls, stairs, furniture, and even the pool itself, creating a continuous, elegant, and fully customized outdoor space.

RESISTANCE TO ANY WEATHER

Intense sun, humidity, temperature changes, chlorine, or constant foot traffic: Dekton remains unchanged. It is perfect for terrace flooring, stairs, or pools that need maximum durability without sacrificing design.

UNIFORM AND CONNECTED OUTDOOR FLOORING.

Large formats allow the cladding of floors, stairs, edges, and areas near pools with Dekton, with very few joints. The result: a cleaner, uniform, and low-maintenance outdoor space.

EXTRA SAFETY IN WET AREAS

Dekton's Grip+ finish provides extra safety on pool edges, enhancing slip resistance without compromising aesthetics.

OUTDOOR KITCHENS

A kitchen with Dekton designed to be enjoyed outdoors worry-free. It withstands sun, heat, stains, and outdoor conditions, creating a functional and stylish space.

RESIDENTIAL FACADES

Dekton or Scalea Natural Stone are two exceptional solutions for house cladding. Resistant to sun, rain, or wind, they provide excellent thermal and acoustic insulation, offering an impeccable look to the house for years to come.

A HOME WITH A VACATION RESORT VIBE

Ifat Mentesh
Interior Planning and Design
Israel

A home with a hotel vibe. That's what the owners of this house were looking to achieve—a couple with three young children and several luxury residences in destinations around the world. "They wanted their house in Israel to feel like a private resort, a constant vacation spot, a place of daily tranquility," explains Israeli designer Ifat Mentesh.

"I greatly value the tones and textures of surfaces, as well as the precision and innovation in creating materials that are not only functional but also convey an artistic presence," explains Mentesh about Cosentino elements such as Dekton Marmorio, the ultra-compact surface with light stripes and filled pores inspired by Navona Travertine.

REASONS TO CHOOSE DEKTON

Darren James
Design & Construct
Australia

The stain, scratch, and UV resistance of Dekton made it equally suitable for interior cladding and outdoor use in this Darren James project, while its slab format created a clean and monolithic look, connecting interiors and exteriors.

Countertop and cladding for interior and outdoor kitchen Dekton **Marmorio**

SIMPLICITY MEETS SOPHISTICATION

Laura Hahne
Switzerland

For the outdoor area, 12 mm Dekton Sabbia slabs were chosen. Since its introduction in 2023, the color Sabbia has delighted with its harmonious combination of pleasant lightness and simple elegance.

These slabs are not only visually appealing but also extremely functional, as they do not heat up during summer temperatures.

Laura Hahne highlights: "In 2023, Dekton Sabbia entered the market, and the color immediately appealed to me for the outdoor area. It's very fun, yet calm and beautifully simple."

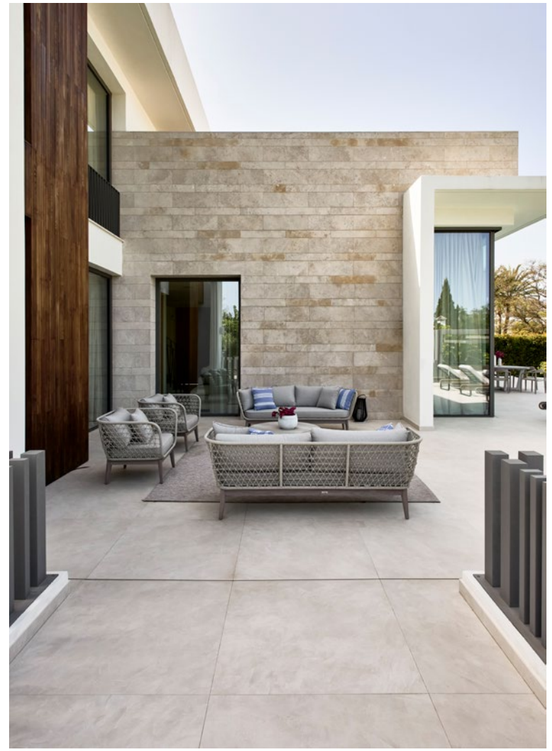
Outdoor flooring
Dekton **Sabbia**

PRIVACY WITH OUTDOOR OPENNESS

Matias Casaux Alsina
Cynthia de Winne
Uruguay

The choice of materials plays a crucial role in this unique indoor-outdoor relationship, where the ultra-compact surface Dekton Danae comes into play. "The coherence between the interior and exterior became a decisive factor when choosing the flooring material. It had to meet the requirements of providing indoor comfort, with underfloor heating, and withstand the adverse conditions of the outdoor climate," notes the architect.

Outdoor flooring
Dekton **Danae**



VILLA IMAGINE IN MARBELLA

José Luis Troyano (Troyano Arquitectos) | María Ortega (Natural Interiors)
Spain

"We chose Dekton for the excellent properties of the material and how well it performs in various applications," explains the professional. The Cosentino material impressed the team so much that it is featured in indoor and outdoor flooring, swimming pool basins, shower trays, vanities, stairs, ...Dekton Albarium color is used in outdoor pavements, withstanding harsh weather conditions effortlessly.

Dekton **Albarium**

FURNITURE

FURNITURE DESIGN WITH A DISTINCT IDENTITY

From straight geometries to organic shapes, Dekton, Silestone, and Sensa enable the creation of custom tables and modules with a robust aesthetic designed for everyday life. Surfaces that add character and naturally integrate into any interior style.

FURNITURE THAT UNIFIES THE SPACE

Using the same material for countertops, floors, and furniture creates more cohesive interiors. Cladding cabinets, drawers, or island fronts generates a monolithic, clean, and elegant effect that visually organizes the entire space.

LIGHTNESS AND PRECISION WITH DEKTON SLIM

The ultra-thin 4 mm Dekton Slim format makes it easy to clad doors, islands, or shelves with a lightweight and contemporary finish, while maintaining Dekton's durability and performance as a material.

This table in Dekton Laurent brings character and sophistication to outdoor spaces thanks to its dark and elegant veining. Its resistance to sunlight, temperature changes, and stains makes it the perfect piece for outdoor areas seeking design and durability.

Outdoor table
Dekton **Laurent**

This low table composition in two pieces of Dekton Danae stands out for its sandy tone and warm, contemporary aesthetic. It is paired with a dining table made in Dekton Khalo, adding a touch of sophistication with its interplay of veining and contrasts. Together, these pieces create a modern, balanced, and highly functional set.

Table and furniture
Dekton **Khalo**

Table and furniture
Dekton **Danae**

This island in Dekton Sabbia, clad on its fronts with 4 mm pieces, creates a continuous surface that unifies the doors and countertop with the same finish. Its soft tone adds light and calmness, while the invisible Gaggenau induction integrated beneath the surface allows for a multifunctional and minimalist kitchen.

Kitchen door and island cladding
Dekton **Sabbia**

Silestone is perfect for creating small furniture pieces such as these tables in Ethereal Noctis, offering a clean and timeless design, characterized by a light background and very subtle dark veins. These versatile pieces are ideal for adding elegance to living areas.

DEKTON®
THE ULTRACOMPACT SURFACE

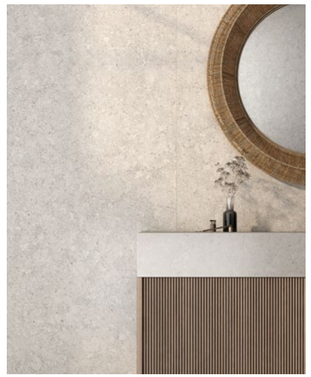
Dekton® by Cosentino is the large-format surface manufactured through an innovative process of ultra-compaction and particle fusion. A technical surface with extreme resistance and great versatility, perfect for use in exterior architecture, interior design, and furniture.

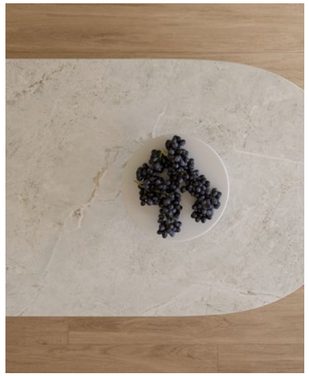
MAXIMUM PERFORMANCE IN ANY APPLICATION

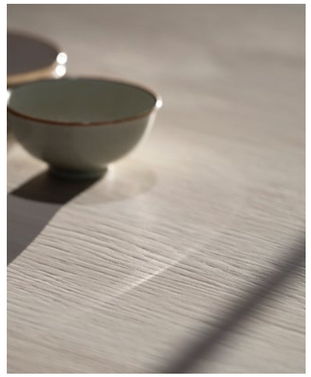
- → High heat resistance: you can place hot pots and pans directly on the surface.
- → Great hardness and scratch resistance.
- → Low porosity: does not absorb liquids or stains.
- → Exterior stability: also ideal for outdoor kitchens and barbecues, facades, and terrace flooring.
- → Sophisticated and complex designs with unique veins and textures.

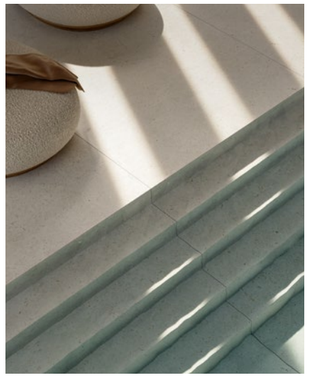
Ideal for:

Kitchen countertops, furniture, wall cladding in bathrooms and showers, indoor and outdoor flooring, facades, or high-demand interior design or architectural projects.









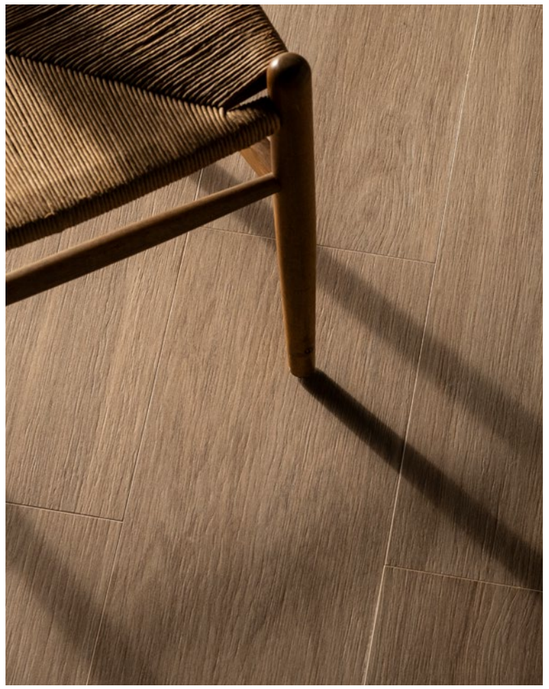
DEKTON

LATEST COLLECTIONS

NOMAK

VISUAL CONTINUITY.
TIMELESS DESIGN

Nomak redefines the essentials to create serene and minimalist spaces with a subtle design that brings visual calm to any project.



AMAZONIK

IT'S NOT WOOD.
IT'S DEKTON

Our reinterpretation of wood through Dekton's technical approach, transforming its veins into an ultra-compact surface.

PIETRA EDITION

TIMELESS ELEGANCE WITH
A MEDITERRANEAN SOUL

A tribute to Mediterranean natural stones while elevating their design, features, and sensory perception.

PIETRA KODE

ICONIC ITALIAN STONES.
RECONSTRUCTED

Pietra Kode: the most iconic Italyn stones decoded by Dekton for the architecture of tomorrow.

SILESTONE®
MINERAL LOW SILICA SURFACES

Silestone® by Cosentino is the first hybrid mineral surface with low crystalline silica content, crafted from a blend of premium minerals and recycled materials. In addition to its unique aesthetics, it offers high resistance, durability, and versatility for interior applications.

DESIGN, COLOR, AND GREAT DURABILITY

- → Perfect for creating kitchens and bathrooms with lasting personality.
- → Wide range, with various colors and finishes.
- → Daily use resistance: easy to clean, impact and stain resistant, and very pleasant to touch.
- → Unique shine and depth in its category.

Ideal for:

Kitchen and bathroom countertops, islands, sinks, bathroom walls and showers, furniture, or interior spaces where design and practicality are key.

SUMA

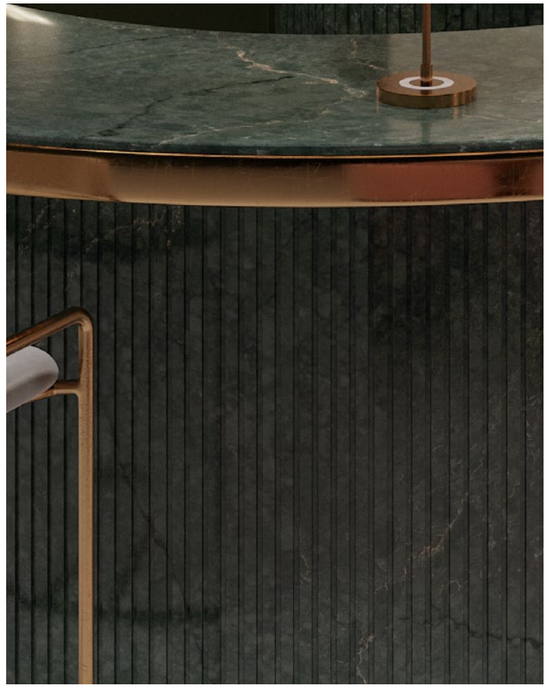
THE CHARM
OF ESSENTIALS

In a world of constant overstimulation, let your home become a relaxation oasis through clean and balanced design, with colors that brighten and refresh.

LE CHIC & LE CHIC BOHÈME

VEINED PATTERNS.
REBORN

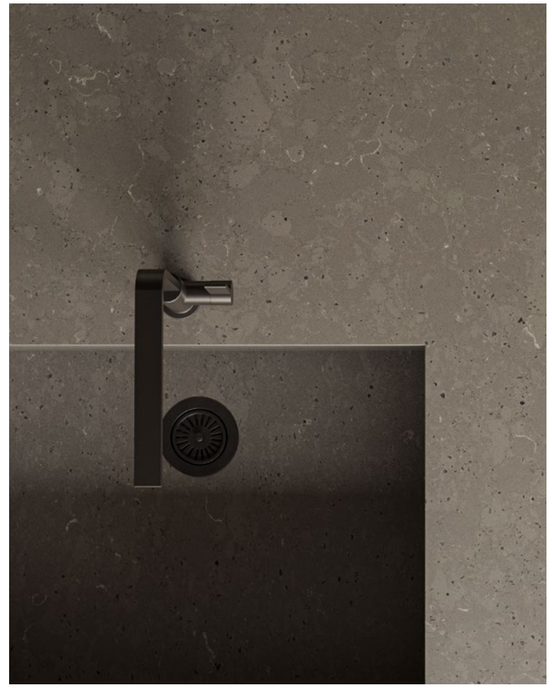
Le Chic and Le Chic Bohème are two unique collections that redefine a timeless classic. A step forward in veined surface design.



UKIYO X SILESTONE

REDISCOVER THE AESTHETIC
POTENTIAL OF SILESTONE

Ukiyo explores the grooved finish in Silestone. A feature that enhances vein continuity throughout its thickness, adding a new dimension to its textures.



URBAN CRUSH

FOR URBAN
LOVERS

Urban textures. Urban Crush colors. Designed for urban lovers and made with respect for nature.

ĒCLOS®
INLAYERED MINERAL SURFACES

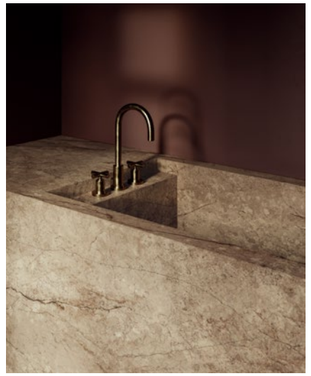
ĒCLOS is the new generation of mineral surfaces, with an integrated layered design throughout its thickness and superior heat resistance. Ēclos is a high-performance material with realistic aesthetics and a natural touch and look, ideal for interior applications.

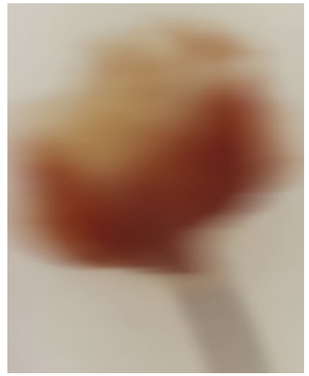
THE NEW GENERATION OF MINERAL SURFACES

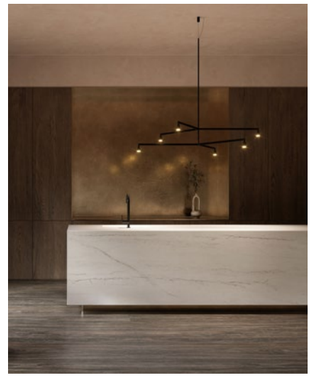
- → INLAYR® technology with integrated 3D design.
- → Superior heat resistance, up to 428°F, even in direct contact with recently used kitchen utensils.
- → Realistic aesthetics. Natural look and feel. A tactile experience full of depth that feels authentic.
- → Low porosity and easy maintenance: does not absorb stains or liquids.
- → High hardness and scratch resistance, even in demanding environments.
- → Great versatility for interior spaces: kitchens, islands, bathrooms, and high-traffic areas.

Ideal for:

ĒCLOS is exclusively designed for indoor applications. It is ideal for high-demand spaces that require superior heat, impact, or scratch resistance, or elevated design.







COLOR PORTFOLIO

ĒCLOS
ECLECTIC VEINS

Imagine immersing yourself in a space where organic veining flows and interlaces into intricate patterns that emerge over dynamic, moving backgrounds. Eclectic Veins is a collection defined by eclectic veining design, embodying the emergence of a new aesthetic: a fusion of the organic beauty of nature and the precision of our exclusive INLAYR® design technology.

The result enables the creation of unique interior environments, true living ecosystems of innovation. Each color radiates energy and depth, making every space feel vibrant, dynamic, and singular.

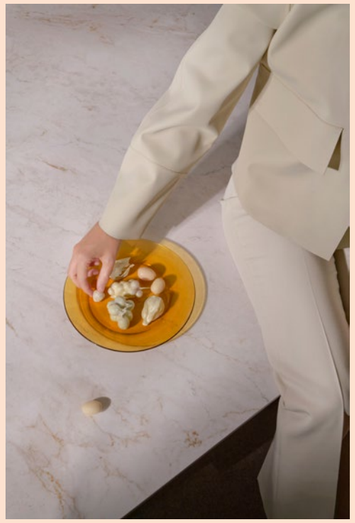
ECLECTIC VEINS COLLECTION



LANDR
LAYERS OF LIGHT AND SHADOW

Subtle golden veins intertwine in a play of light and shadow on a white background, enhancing its organic beauty and unique character. The soft, muted tones convey a minimalist and relaxing elegance, evoking a discreet luxury.

WONDR
LAYERS OF GRAYS AND GREENS

A luminous white base traced with flowing gray and blue veins, intentionally moving across the surface. This contrast brings light and personality, creating a sense of wonder on countertops and interiors.

IVORA
NATURAL GEOMETRY

A striking yet elegant color, crossed by a network of fine and linear veins that traverse a light cream canvas with subtle variations. The slightly darker grayish and beige veins create an organic and irregular pattern that adds depth and character.

TAJNAR
ETHEREAL ORGANIC VEINS

A soft, light beige background creates a relaxing ambiance, while delicate ethereal veins in a slightly darker tone intertwine, adding movement and organic depth.

LEGND
SHIMMERING VEINS

A fluid composition of earthy veins and rich shades conveys the serenity of natural landscapes. The muted browns evoke a tranquil sophistication, while striking veins streak across the surface, adding character to any interior space.

PHANTOME
ELEGANCE IN DARK TONE

A deep and smooth black background creates a bold and elegant look, while warm green tones emerge under diffused light. Copper veins with subtle metallic accents add mystery and style to the surface.

SENSA BY COSENTINO® PROTECTED NATURAL STONE

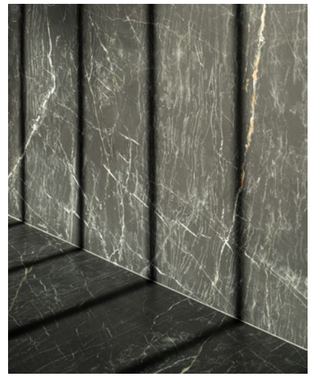
SENSA is Cosentino's premium natural stone range, combining the natural beauty of granites and quartzites selected from quarries around the world with an exclusive stain-resistant treatment at the molecular level for minimal maintenance.

THE BEAUTY OF NATURAL STONE, PROTECTED

- → Natural authenticity: each slab is unique.
- → High stain resistance thanks to its SenGuard treatment, which adds an invisible protective layer.
- → Very easy maintenance with no need for periodic sealing.
- → Premium aesthetics, perfect for elegant and timeless environments.

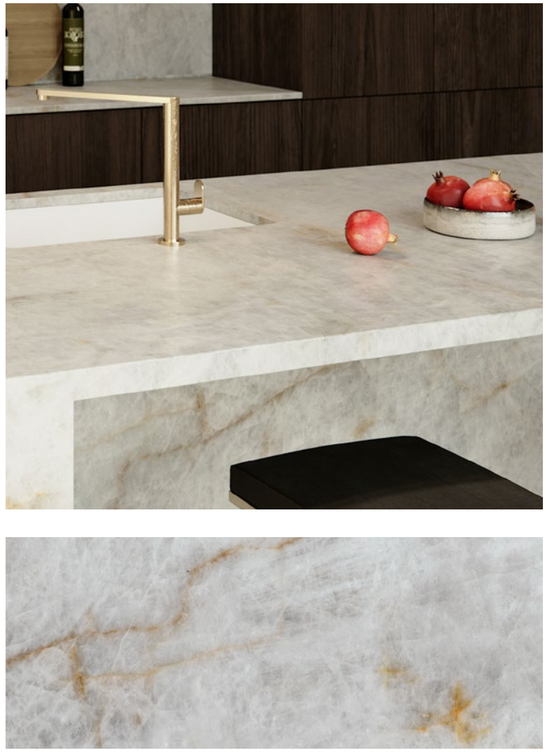
Ideal for:

Kitchens, islands, bathrooms, and high-use surfaces where the genuine beauty of natural stone with advanced performance is desired.



SENSA BY COSENTINO

NEW QUARTZITE COLLECTION



CRISTALO

Mirage ✷

Cristalo is an impressive natural stone with translucent shades ranging from white to light gray and subtle veins. Its silver hues evoke an expansive field of ice and snow, creating a relaxing atmosphere in any space.

MARAU

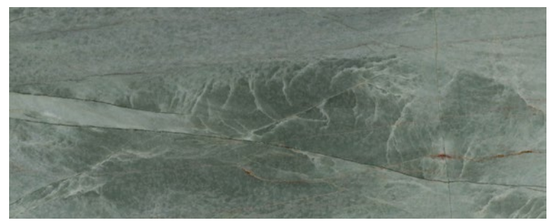
Mirage ✷

Marau is a cool gray quartzite with satin finish, featuring hints of blue, gold, burgundy, and cream. Its striking pattern blends broad veins and sharp lines, creating a dynamic and elegant visual effect.

OIHANA

Mirage ✷

Oihana features white veins that glide across its dark surface, shifting the pattern with hints of gray, cream, and brown. The clear lines create dynamism, captivate the eye, and evoke unexpected depths against the intense black background.



ITARA

Mirage ✷

Emerald green quartzite with soft accents in white and copper, resembling foamy waves that move gently and peacefully. It is a refined and sophisticated stone with a life of its own.

COSENTINO WARRANTIES

Standard Cosentino warranty letter

This warranty letter (hereinafter referred to as the "Warranty") will only be valid if the buyer registers the project within 6 months after the product purchase, as indicated in the corresponding section, and presents the original invoice or sales receipt (indicating the sale date and the distributor's name), making the defective product available to COSENTINO GLOBAL S.L.U (hereinafter referred to as "COSENTINO"). To activate the Warranty, it must be registered online on the website. www.cosentino.com. This Warranty is transferable.

COSENTINO reserves the right not to offer free warranty service if the requirements outlined above are not met or if the information provided by the consumer is false, incomplete, or illegible.

This Warranty is intended for non-professional end users and will be considered applicable for residential use, defined as any building or area designated for private accommodation, whether single-family or multi-family housing.

Final products manufactured by Cosentino

This section of the Warranty is limited to final products manufactured under any COSENTINO brands, with a three-dimensional shape, such as kitchen sinks, bathroom sinks, countertops, shower trays (hereinafter, "Final Products"), and covers possible manufacturing defects in these products for a period of FIVE (5) YEARS from the purchase date.

All provided under the terms, conditions, and limitations described for other SILESTONE or DEKTON by Cosentino products in this document, also available on the website.

This Warranty will only be valid if the final products have been properly installed (in accordance with current regulations and specific assembly instructions) and correctly used as intended (Usage, cleaning, and maintenance guide).

Consumable items (rubber elements, seals, valves, etc.) are not covered by this warranty.

Warranty registration

To register as the warranty holder, it must be activated via the website www.cosentino.com. On the website, necessary registration details are requested, including information about the sales point and/or stonemason and the customer. We recommend that client activation be carried out directly at the sales point or with the stonemason. At the end of the process, the client has the option to print their warranty for use.

To enjoy the Warranty, you must register it within six (6) months of purchase.
